

MAXXI COIN WHITEPAPER

Introduction

MAXXI COIN is a community-based cryptocurrency financial services network. As traditional finance has lost its vitality, the emerging and fast-growing blockchain industry has brought rapid development and high returns to the sector and its customers. MAXXI COIN aims to build a community-based financial network composed of individuals. Individuals are both the network's creators and beneficiaries. MAXXI COIN acts as the organizer and service developer of its network.

Existing Problems

- **Traditional financial institutions impose high fees with low returns**

Traditional financial institutions have caused unnecessary internal and external consumption due to institutional barriers, and these have been transferred to users, resulting in excessive fees at traditional financial institutions. At the same time, traditional financial institutions have lost their vitality, resulting in lower returns.

- **Traditional financial institutions mainly target high net worth individuals**

Traditional financial institutions can only serve high-net-worth individuals due to their inefficiency. It is close to impossible for ordinary users to obtain high-quality financial services from traditional institutions.

- **No Consensus between Project Initiators and Participants**

Existing Blockchain projects typically initiate their crowdfunding through seed and private rounds unbeknownst to the general public. As most projects do not attract early-stage supporters, many of them are unsuccessful or the price of their token falls below the public sale price right after the first exchange listing. Under that model, project parties attract speculative users to their communities, instead of meaningful supporters. That alone could be a factor that could lead to a project's failure.

- **Trust Issues**

Currently, the exchange of information is usually controlled by a centralized organization. Cryptocurrency-interested parties are aggregated in information channels manipulated by the organization, such as official Telegram Groups and other social media. There are no third-parties involved, such as decentralized, community-based platforms where users can exchange opinions openly. Users' points-of-view can be mutually peer-reviewed, scored, and evaluated by other users, thereby forming a transparent network where excellent opinions stand out.

MAXXI COIN's financial services include:

- **Invest**

MAXXI COIN selects projects with a higher probability of success, through rigorous and highly selective due diligence, to provide users with investment opportunities.

For users, MAXXI COIN presents all of the project parties' main data, including both static and dynamic information, such as social media updates, community activity status, big data aggregation regarding the projects' search volume, etc. Moreover, MAXXI COIN provides in-depth communication between its projects and the community, enabling users to gain a holistic understanding of projects in all their dimensions. Users are able to participate in multiple projects' Public Sales once they go through Know Your Customer (KYC), saving time and cost to project parties.

- **Savings**

Users can save different cryptocurrencies on MAXXI COIN, such as BSC, BTC, USDT, and MAXX, to get returns according to savings terms.

- **Loan**

Users can lend a certain percentage of USDT to the platform or to other platform users by tying cryptocurrencies such as BTC, BSC, MAXX.

- **Exchange**

MAXXI COIN provides cryptocurrency trading services.

- **OTC**

Users can trade their tokens on the MAXXI COIN platform after a public sale ends and before their tokens are listed on the exchange. This allows liquidity for as-yet unlisted currencies.

- **News**

MAXXI COIN will aggregate and recommend assorted cryptocurrency news, reports, announcements, etc. that users are interested in.

- **Community**

Users can participate in discussions of various projects on MAXXI COIN, follow other users, and discover content of interest.

MAXXI COIN Features

We store the vast majority of cryptocurrencies in secure online storage. All investment is fully insured. Security is our number one priority.

- **Great Rates, Great Benefits**

MAXXI COIN offers great rates and great benefits to users through mortgage loans, quantitative trading, preferred investment, and profit sharing from the MAXXI COIN website.

- **Complete Risk Control**

We maintain strong risk management, compliance with regulations, and excellent operational controls.

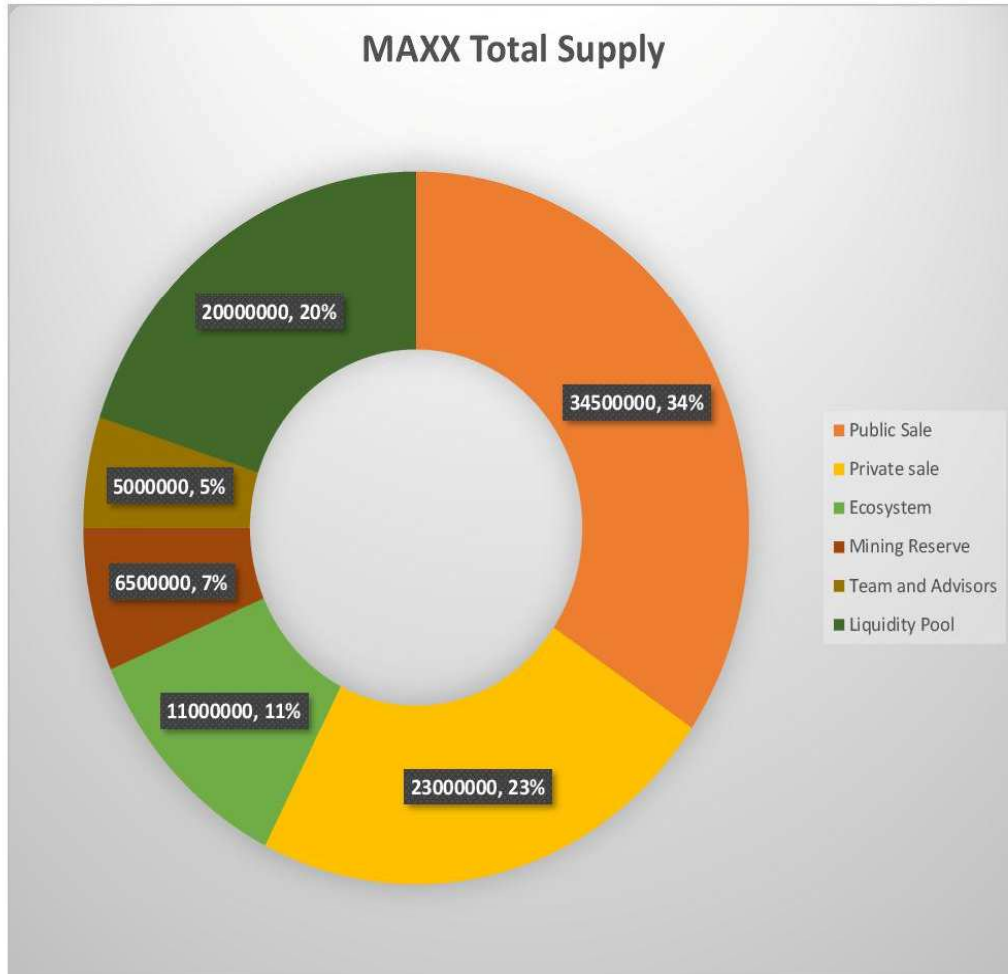

- **0 Fees**

No annual, transaction and other account fees. Fee free, for real.

MAXXI COIN Token (MAXX)

MAXXI COIN Token (MAXX) represents Proof-of-Usage and Proof-of-Stake of the MAXXI COIN network. MAXX is the token issued by MAXXI COIN. The total supply of MAXX tokens is 100 million.

Token Distribution Ratio

Fundraising: 57.5% of the total supply (Private and Public sale)

Team and Advisors: 5% of the total supply

Liquidity Pool: 20% for Pancakeswap & Sushiswap Listing

Growth: 11% Reserved for airdrop, exchange listing

Pool Reserved for Mining: 6.5% reserved for the network incentives for Mainnet

Distribution Mechanism

34.5% of the MAXX allocated for public sale will be unlocked immediately after the public sale period ends, 5% of the team and advisors and early investors will be linearly unlocked within one year, and the rest will be issued in accordance with the mechanism of simultaneous release of activity incentives. 23% of the MAXX will be allocated to reward users as 'Activity Incentives'. 37.5% of the MAXX is allocated to the liquidity pool, growth and pool reserved for mining, which is called the release part. The release part is released synchronously according to the activity incentive part.

MAXX Utility

- **Become a member**
- **Investments**
- **Lending**
- **As transaction fee**
- **Community payment**

Proof-of-Usage

The allocation of MAXX is measured by the amount of contribution each user makes to the MAXXI COIN network. MAXX rewards are available for effective activities at MAXXI COIN and for contributing to the MAXXI COIN network. 57.5% of the total supply of MAXX will be used to reward users who contribute to the MAXXI COIN network. Effective activities include: inviting friends to join the MAXXI COIN network, participating in MAXXI COIN's investment activities, participating in MAXXI COIN's deposit activities, participating in MAXXI COIN's lending activities, and contributing high-quality analytical articles.

Proof-of-Stake

The users of MAXXI COIN Network have the right to earn MAXX tokens. MAXXI COIN allocates 57.5% of the total supply of MAXX participants holders of MAXX. MAXXI COIN distributes 57.5% of its total supply among MAXX holders in proportion to the number of MAXXs owned by them. For example, in a certain allocation period, MAXXI COIN's profits to be distributed is 100BTC+200BSC, and a user holds 1% of the total MAXX in circulation. Then, in this allocation period, that user should receive 1BTC+2BSC.
